

D&B minutes of meeting

—IOT, Telecommunications engineering and management, Electronic commerce and law

Time: 2023.10.10

Place: Room 324, Teaching Building No. 3, Beijing University of Posts and Telecommunications

Meeting subject: The group members formally discussed how to combine the different modules of the three majors and complete the task requirements.

participant: Hengrui Hu, Zhiyu Feng, Cheng Mao, Jingru Chen, Zhixiang Zhang, Yuchen Yang, Yudan Cui, Wenxiang Ma, Xiangjun Liu, Yinsong Chen, Liangqi Li.

Meeting content:

1. Clearly realize the method of data transmission: through Bluetooth connection, the location information of the car and the image information taken by the car camera are transmitted to the pc end. The pc reads the serial port by using pyserial as the API and saves the data to the mysql database. Finally, the object detection algorithm is used to detect what the treasure is. The data is then retrieved and processed in the web application.
2. The team members completed the task step by step at the meeting place, and finally went to the basement of the eighth teaching building of Beijing University of Posts and Telecommunications to test the performance of the car with the help of teaching tools, and completed the video recording.
3. Select the speaker for the defense and prepare answers to questions that the defense may cover.
